Enjoy your XFINITY® TV right away! Program vour remote to

XFINITY XR11 Remote Control **USER'S GUIDE**

It's simple to program your XFINITY Remote to control your TV and Audio Video Receiver.

Your XFINITY Remote is already programmed to control your set-top box. To program the remote for control of Power. Volume, Mute and TV Input on your TV or Power, Volume, and Mute on your audio video receiver (AVR), including a soundbar, follow the steps below.

Note: A soundbar is a type of AVR.

Here's how to program your remote for control of a TV or TV and AVR:

- 1. Remove the battery pull tab from the remote control battery compartment and make sure your TV, AVR and set-top box are powered
- 2. Refer to the "Setup Codes for TVs" and "Setup Codes for AVRs" sections on the back of this guide to find the manufacturers of your
- 3. Press and hold the **Setup** button on your remote until the status LED changes from red
- 4. Enter the first code listed for the TV manufacturer. The status LED should flash green twice when the code is entered.
- 5. Press the TV Power button on the remote. If the TV turns off, you have successfully programmed your remote. Turn the TV back on and press the VOL +/- and Mute buttons to confirm they control the volume of your device
- 6. If the TV (or AVR) does not turn off or the VOL +/- and Mute buttons do not work, repeat the steps above using the next code listed for your TV manufacturer.

If you only want to program your remote for TV control, you're all set Continue with the following steps to program

your remote for AVR control Note: To program your remote for simultaneous control of both a TV and AVR, the TV must be

7. Press and hold the **Setup** button on your remote until the status LED changes from red

programmed before the AVR

- 8. Enter the first code listed for the AVR manufacturer. The status LED should flash green twice when the code is entered.
- 9. Press the All Power button on the remote. If the AVR turns off, you have successfully programmed your remote. Turn the AVR back on and press the **VOL** +/- and **Mute** buttons to confirm they control the volume of your device. If so, you're all set!
- 10.If the AVR does not turn off or the VOL +/and Mute buttons do not work, repeat the steps above using the next code listed for your AVR manufacturer.

Here's how to program your remote for only AVR control:

- 1. Remove the battery pull tab from the remote control battery compartment and make sure your AVR and set-top box are powered on.
- 2. Find the manufacturer of your AVR on the back of this guide.
- 3. Press and hold the **Setup** button on your remote until the status LED changes from red

- 4. Enter the first code listed for the AVR manufacturer. The status LED should flash green twice when the code is entered.
- 5. Press the **TV Power** button on the remote. If the AVR turns off, you have successfully programmed your remote. Turn the AVR back on and press the VOL +/- and Mute buttons to confirm they control the volume of your device. If so, you're all set!
- 6. If the AVR does not turn off or the VOL +/and Mute buttons do not work, repeat the steps above using next code listed for the device manufacturer. You may need to try several codes to find the one that works for vour device.

CAN'T FIND YOUR CODE?

If you can't program your remote for TV and/ or AVR control using the codes on the back of this guide, follow the steps below to search for

- 1. Turn on your TV and AVR.
- 2. Press and hold the **Setup** button on your remote until the status LED changes from red
- 3. To search for a TV code, enter 9-9-1 on the remote. To search for an AVR code, enter 9-9-2. The status LED should flash green
- 4. Press the CH ^ button repeatedly to search through the manufacturer codes until the device you are programming turns off.
- 5. After the device turns off, press **Setup**. The status LED on your remote should flash green twice. Press the TV Power button on the remote. If the device turns on, your have successfully programmed your remote.

Troubleshooting

GENERAL TROUBLESHOOTING

- 0: Why does the status LED flash red then green while I am entering the code on my
- A: You may have entered an incorrect code. Check the code and try re-entering it.
- 0: Why does the status LED flash red, but there is no response when I press a key?
- A: Make sure the remote is aimed at your TV or AVR and is no farther than 15 feet away. Also, make sure your set-top box is powered on and in plain sight.

Helpful Tip: Additional remote control program ming support, including code lookup tool and frequently asked questions, can be found at xfinity.com/remotes.

Additional Feature: Aim Anywhere Control See the back of this user guide to learn how to pair your remote and set-top box* for Aim Anywhere control, allowing you to control your devices even when they are placed behind your TV or in another room (up to 50 feet away).

*Aim Anywhere control is not supported by all set-top boxes.

Nota:

This equipment has been tested and found to comply with the limits for a Class B dig-

ital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not used in accordance with the instructions, may cause harmful interference to radio communications.

FCC Compliance Statement

There is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving anten-
- Increase or decrease the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that which the receiver is connected
- Consult the dealer or an experienced remote control/TV technician for help.
- It is strongly recommended that the TV be plugged into a separate wall outlet

The user is cautioned that changes and modifications made to the equipment without the approval of the manufacturer could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

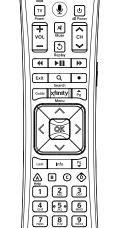

"CAUTION": Exposure to Radio Frequency Radiation. Antenna shall be mounted in such a manner to minimize the potential for human contact during normal operation. The antenna should not be contacted during operation to avoid the possibility of exceeding the FCC radio frequency exposure limit.

Pairing your Xfinity Remote for Aim Anywhere Control

Your XFINITY Remote can be paired with Aim Anywhere devices, including select set-top boxes, allowing you to control your devices even when they are placed out of line-of-sight (for example, in an entertainment center or behind your TV). XFINITY Remotes can be identified by a model number beginning with "XR" on the back of the remote.

Aim Anywhere Pairing:

- 1. Press and hold the **Setup** button for 3 seconds, until the status LED changes from red to green.
- 2. Press the XFINITY button on the remote. Your TV should display on-screen instructions to enter a 3-digit code. If the instructions do not appear, press the XFINITY button again - up to 2 more times.
- 3. Follow the on-screen instructions to enter the 3-digit code that appears.
- 4. Once the code is correctly entered, your XFINITY Remote is paired with the device.

Need to Remove Aim Anywhere Control?

Once your remote control is paired to your settop box it is uniquely paired and will not control any other set-top box in your home unless you pair it with another device.

If you would like to use your remote to control multiple XFINITY set-top boxes simultaneously, you can remove Aim Anywhere pairing by following the steps below.

- 1. Press and hold the **Setup** button on the remote until the status LED changes from red to areen.
- 2. Press A on the remote. If the status LED blinks green twice, you have successfully removed Aim Anywhere control.

You can now use your remote to control other Comcast set-top boxes simultaneously.

Frequently Asked Questions about Aim Anywhere Control:

green then red during pairing?

- Q: Why does the status LED flash red then
 - A: The set-top box you are attempting to pair may not be powered on, or may not support Aim Anywhere control. If the on screen instructions to enter a 3-digit code do not display on your TV when attempting to pair, your set-top box does not support Aim Anywhere control.
 - Q: When paired, why does the status LED flash green then red when pressing a button on the remote?
 - A: The set-top box that is paired with your remote may not be powered on or may be out of range. If your device is powered on and within 50 feet of the remote, try re-pairing vour remote.
